LETTER OF TRANSMITTAL

Raleigh, North Carolina
October 12, 1955

The Honorable Luther H. Hodges
Governor of North Carolina
Raleigh, North Carolina

Dear Governor Hodges:

I have the honor of transmitting the report for the Public Health Statistics Section of the Epidemiology Division, State Board of Health, covering the calendar year 1954.

Respectfully submitted,

J. W. R. NORTON, M.D.
Secretary and State Health Officer

17. Accidental deaths by cause, color, and sex with crude rates per 100,000 estimated population: North Carolina, 1954.....	113
18. Resident Infant deaths by cause and age: North Carolina, 1954.....	114
19. Resident infant and maternal deaths by color with rates per 1,000 live births: North Carolina and each county, 1954 and five-year average, 1950-1954	116
20. Resident live births, illegitimates, deaths, stillbirths, infant deaths, and maternal deaths by color (Indians included in "nonwhite") with number occurring in hospitals: North Carolina, each county, urban and rural, 1954.....	120
21. Resident live births, illegitimates, deaths, stillbirths, infant deaths, and maternal deaths of Indians with number occurring in hospitals: North Carolina, each county, urban and rural, 1954	132
22. Resident live births and deaths (excluding stillbirths) by color and institution of occurrence: North Carolina and each county, 1954.....	134
23. Resident stillbirths by color and sex with rates per 1,000 live births: North Carolina and each county, 1954.....	138
24. Resident stillbirths by color and sex with rates per 1,000 live births: each incorporated place having a population of 10,000 or more, 1954	141
25. Resident stillbirths by age of mother, color, and attendant with percentage distribution: North Carolina, 1954.....	142

INTRODUCTION

The thirty-ninth annual report, Part II, of the Public Health Statistics Section, formerly known as the Bureau of Vital Statistics, presents tabular information regarding North Carolina's population, births, deaths, and stillbirths. The majority of the tabulations are by place of residence; selected tabulations, in whole or in part, are given by place of occurrence. Communicable disease morbidity data are shown in Part I of the annual report of the Section which is printed separately.

Reports have been published annually since 1914 with the exception of the years 1918 and 1919.

Certificates of births, deaths, and stillbirths occurring in 1954 that were filed in 1954 and the first three months of 1955 are included in this report. It is estimated that vital events occurring in 1954 but reported after the first three months of 1955 will comprise less than two per cent of the total 1954 events. There are strong indications that registration in the state has been improving in recent years. The certificates are more complete and accurate and on the average have been filed more promptly.

Again in 1954 a tabulation was made of all birth and death certificates filed in 1954 by year of occurrence (see 1950 or 1951 annual report for explanation of interpretation). This was done in an effort to determine the per cent of certificates filed in time to be included in an annual report as compared with those filed too late to be included. The results of this study are shown in Table 8 of this report. This tabulation was prepared by county of residence in order to make available a correction factor that could be used by each county to more accurately calculate the natality and mortality rates.

Natality

In 1954 there were 114,563 live births occurring to mothers who were residents of the state. All births were allocated to the place of residence of the mother regardless of the place of birth or the length of residence. Births occurring in hospitals, sanatoria, and all other institutions, were allocated to the place where the mother lived. Births occurring on military bases to military personnel were allocated according to the residence shown on the certificate. The crude birth rate was 26.8 births

per 1,000 population. There were 76,374 white births and 38,189 nonwhite births. For the eighth consecutive year, over 100,000 births were recorded.

This state defines a stillbirth as a fetus showing no evidence of life after complete birth if the twentieth week of gestation has been reached. There was 2,353 resident stillbirths reported resulting in a ratio of 20.5 stillbirths per 1,000 live births. If stillbirths were considered as a single cause of death, they would rank fourth between cancer and influenza and pneumonia as a leading cause of death.

Premature Births

In order to achieve uniformity in the classification of premature infants in need of special care, and comparability of statistical data in hospitals and in studies of such infants, the definition of the American Academy of Pediatrics has been adopted; that is, a premature infant is an infant weighing 2500 grams (5½ pounds) or less at birth regardless of the period of gestation.

In 1954 there were 9,126 resident premature live births reported among 114,563 live births. Birth weight was reported on all but 212 certificates filed in 1954. Consequently, at least 8.0 per cent of the newborn babies weighed 2500 grams or less at birth. The number of premature infants by birth weight and color and by birth weight and age of mother are shown in the tables which follow:

RESIDENT PREMATURE LIVE BIRTHS BY COLOR AND WEIGHT: NORTH CAROLINA, 1954

Birth Weight in Grams	Total	White	Nonwhite
Total	9,126	5,315	3,811
500 or less.....	54	27	27

Mortality

There were 31,482 resident deaths recorded in 1954. The crude death rate was 7.4 deaths per 1,000 estimated population. Deaths were allocated to the place where the deceased resided unless the place of death item indicated that the deceased had been in the place of death for one year or more. In such cases they were allocated to the place of death, unless the death occurred in an institution. If this was the case, they were allocated to the place of residence, regardless of the length of stay in the institution.

Diseases of the heart, as they have been for the past 25 years, were responsible for more deaths than any other cause, accounting for approximately one-third of all deaths for the year.

All mortality statistics shown by cause in this report are classified according to the Sixth Decennial Revision of the International Lists of Diseases and Causes of Death. This is the sixth year that this revised statistical code has been applied to the causes of death.

In Table 14, regarding deaths from selected causes, 1916-1954, it is necessary to take into consideration the effect of the revision of the International List and of the joint cause of death coding procedure in making comparisons between the trend in causes of death since 1949 with prior years. Comparability ratios for specific causes of death may be obtained upon request.

Infant and Maternal Mortality

There were 3,447 infant deaths and 91 maternal deaths reported. The resultant infant and maternal death rates per 1,000 live births were 30.1 and 0.8 respectively. The maternal mortality rate was the lowest on record. The actual number of maternal deaths represent a new low dating back to 1914.

In 1918, there was an all-time high rate of 101.8 infant deaths per 1,000 live births. The infant mortality rate was more than three times as high thirty-six years ago as it was in 1954 while the maternal rate was 13 times higher at that time.

Hospital Data

All tables in this report which reflect events occurring in hospitals are based on the general and allied hospital definition of the North Carolina Medical Care Commission. A hospital is defined as a place where two or more non-related individuals reside 24 hours or more on the premises and receive medical care over and above any domiciliary care.

Rates

All rates shown in this report are crude rates unless otherwise specified. Such rates have not been adjusted for differences in the age, sex, color, rural or urban distribution of the population, or for under-registration or late reporting. Such factors should be kept in mind when comparing two different areas or time periods.

* All population estimates by U. S. Census Bureau except 1951-1954 which were estimated by PHSS. Census years 1920, 1930, 1940, 1950 not estimated. Number births and deaths revised in accordance with national reports published 1917-1952 for births, and 1916-1952 for deaths.

a Stillbirths included in births 1914, 1915.

b Births, deaths, infant deaths, and maternal deaths by place of residence, 1939-1954; previous years by occurrence.

TABLE 17.—ACCIDENTAL DEATHS BY CAUSE, COLOR, AND SEX WITH CRUDE RATES PER 100,000 ESTIMATED POPULATION: NORTH CAROLINA, 1954

Type of accident (International code number follows each cause)	Place of occurrence					
	Total		White		Nonwhite	
	Number	Rate	Male	Female	Male	Female
All accidents.....	2,486	58.2	1,230	407	618	231
Railway accidents (800-802).....	32	0.7	22	2	8	—
Motor vehicle traffic accidents (810-825).....	1,034	24.2	564	149	261	60
Accident involving collision with railway train (810).....	27	0.6	13	4	7	3
Accident to pedestrian (812).....	226	5.3	95	36	72	23
Other accidents involving collision (811, 813-819).....	324	7.6	177	74	60	13
Noncollision traffic accidents (820-824).....	434	10.2	263	34	116	21
Accident of unspecified nature (825).....	23	0.5	16	1	6	—
Motor vehicle nontraffic accidents (830-835).....	33	0.8	17	7	5	4
Other road vehicle accidents (840-845).....	10	0.2	5	—	5	—
Water transport accidents (850-858).....	59	1.4	46	2	10	1
Aircraft accidents (860-866).....	39	0.9	38	1	—	—
Accidental poisoning by solid and liquid substances (870-888).....	47	1.1	17	6	20	4
Accidental poisoning by gases and vapours (890-895).....	7	0.2	5	—	2	—
Accidental falls (900-904).....	289	6.8	131	112	31	15
From one level to another (900-902).....	121	2.8	67	28	21	5
On same level (903).....	120	2.8	46	63	6	5
Unspecified falls (904).....	48	1.1	18	21	4	5
Blow from falling object (910).....	55	1.3	31	2	21	1
Accident caused by machinery (912).....	49	1.1	39	4	6	—
Accident caused by electric current (914).....	43	1.0	31	4	6	2
Accident caused by fire and explosion of combustible material (except conflagration) (916).....	141	3.3	30	27	40	44
Conflagration (916).....	69	1.6	23	5	24	17
Accident caused by hot substance, corrosive liquid, steam, and radiation (917, 918).....	14	0.3	5	2	2	5
Accident caused by firearm (919).....	83	1.9	45	9	24	5
Inhalation and ingestion of food or other object causing obstruction or suffocation (921, 922).....	70	1.6	19	16	18	17
Accidental mechanical suffocation in bed and cradle (924).....	90	2.1	12	18	30	30
Accidental drowning and submersion (929).....	156	3.7	77	19	58	2
Excessive heat and insolation (931).....	7	0.2	4	1	2	—
Lightning (935).....	12	0.3	8	2	1	1
Complications due to nontherapeutic medical and surgical procedures, therapeutic misadventure, and late compli- cations of therapeutic procedures (940-959).....	24	0.6	5	5	7	7
All other accidents (911, 913, 915, 920, 923, 925, 926, 928, 930, 932-934, 936, 940-962).....	123	2.9	56	14	37	16

TABLE 18.—RESIDENT INFANT DEATHS BY CAUSE AND AGE: NORTH CAROLINA, 1954

Cause of death (International code number follows each cause)	Under 1 day	1 day	2 days	Under 7 days	Under 28 days	Under 1 year
Total all causes	1,090	305	203	1,895	2,217	3,447
Tuberculosis, all forms (001-019)						1
Syphilis and its sequelae (020-029)			1	1	1	2
Whooping cough (056)						6
Typhoid and paratyphoid fever (040, 041)						
Scarlet fever (050)						
Streptococcal sore throat (051)						1
Septicemia and pyemia (053)					2	8
Diphtheria (055)						1
Meningococcal infections (057)						11
Tetanus (061)					3	3
Acute poliomyelitis (080)						
Acute infectious encephalitis (082)						2
Measles (085)						12
Rubella (German measles) (086)						
Leukemia and aleukemia (204)						1
Diseases of thymus gland (273)	1		1	2	2	5
Rickets (active and late effects) (283, 284)						1
Anemias (290-293)						7
Hemorrhagic conditions (295, 296)		1	1	2	3	3
Meningitis, except meningococcal and tuberculous (340)				1	2	23
Otitis media and mastoiditis (391-393)						5
Influenza and pneumonia, except pneumonia of newborn (480-483, 490-493)						
Acute upper respiratory infections (470-475)					2	394
Hernia and intestinal obstruction (560, 561, 570)					3	21
Dysentery, gastritis, enteritis, and colitis, except diarrhea of newborn (045-048, 543, 571, 572)	3	2	1	7	13	19
Congenital malformations (750-759)						
Spina bifida and meningocele (751)	2			4	12	32
Congenital malformations of circulatory system (754)	24	10	17	69	93	159
All other congenital malformations (750, 752, 753, 755- 759)	59	7	13	100	132	203
Birth injuries (760, 761)						
Without immaturity	86	21	14	145	153	154
With immaturity	111	18	11	152	155	156
Postnatal asphyxia and atelectasis (762)						
Without immaturity	109	37	22	188	195	199
With immaturity	130	40	31	224	231	233
Pneumonia of newborn (763)						
Without immaturity	2	5	3	25	64	64
With immaturity	2	2	2	12	17	17
Diarrhea of newborn (764)						
Without immaturity				1	16	16

TABLE 18.—Continued

Cause of death (International code number follows each cause)	Under 1 day	1 day	2 days	Under 7 days	Under 28 days	Under 1 year
With immaturity.....				1	8	8
Other infections of newborn (765-768)						
Without immaturity.....	1		1	8	13	16
With immaturity.....		1		3	6	7
Neonatal disorders arising from maternal toxemia (769)						
Without immaturity.....	2	3	2	10	10	11
With immaturity.....	2			2	2	2
Hemolytic disease of newborn (770)
